

Zimbabwe Early Intervention in Psychosis

Z Factor Project Logical Framework

Narrative summary	Performance Indicators (project Progress)	Data Sources (Means of Verification)	Assumptions (hypotheses) & Risks
<p>Overall Goal Community conversations about psychosis are opened up in Chinyika and Rusike communities of Goromonzi Rural District Zimbabwe</p>	<p>Chinyika & Rusike communities rally behind the public engagement project.</p> <p>General health discussions include psychosis issues</p>	<ol style="list-style-type: none"> 1. Number of people from the communities attending each public engagement event as audience. 2. Number of consistent attendees to the public engagement i.e., stakeholders, drama competitors, the general public, gender aggregation of attendees. 3. Baseline info from a Validated (e.g., Tylor & Dear, 1979, 1981) Community Attitudes towards Mental Illness Scale quantitative questionnaire to longitudinally measure attitude changes of a consistent sample e.g., drama competitor&/stakeholders as a way to measure impact 4. Qualitative interviews with individuals and focus groups through semi structured interviews 	<ol style="list-style-type: none"> 1. Psychosis is an issue in the community therefore should be given centre stage as a community health issue. 2a. Local political & other leadership does not impede community gatherings 2b. Obtaining of institutional permissions (e.g., District Police clearances, Research clearances) will assist in smooth project implementation 2c. Convening the public engagement at a neutral location (e.g., open space community meeting arena or growth point) will encourage various stakeholders to take part as it will not be aligned to a particular treatment model (i.e., clinics which may be viewed as biased towards the medical model of psychosis treatment) 3. There will be a sufficient number of regular workshop attendees from which to get longitudinal data through the duration of the project

Zimbabwe Early Intervention in Psychosis

<p>Purpose To use a psychosis themed drama competition to help combat stigma and open up collaborative pathways between the traditional/faith based and medical models of psychosis treatment</p>	<p>ZimEIP’s relationship with Chinyika & Rusike stakeholders able to influence a community participatory approach in “Z Factor” project implementation.</p> <p>Drama competition able to draw out community members to attend workshops.</p>	<p>Number of public engagement activities & people reached within the 6 months timeframe of the project.</p> <p>Suggested ways of collaboration for the 3 psychosis treatment models.</p>	<p>1. Local traditional leaders’ pledge to promote mental health education in Goromonzi will enable smooth project implementation.</p> <p>2. EIP Village Health Workers will be eager to use the Z Factor project as a platform to provide psycho-education in their communities.</p> <p>3. Cultural/religious affiliations do not interfere with the exploration of a collaborative pathway between traditional/faith based & medical model of psychosis treatment.</p>
<p>Outputs</p> <ol style="list-style-type: none"> Community’s knowledge on the negative impact of psychosis stigma and discrimination is increased. The community is able to detect and seek psychosis treatment early The traditional/faith based and medical model of psychosis treatment agreed on a sustainable way of collaboration in treatment provision Project implementer’s understanding of community perceptions about psychosis 	<ol style="list-style-type: none"> Public engagement workshops carried out to educate communities on stigma & discrimination Psychosis treatment options available in the community are explored and community is empowered to make an informed choice of the pathway to care All community Mental health service providers (e.g. traditional healers, faith healers, churches) are engaged along with the general community to explore ways of collaboration in the provision & 	<ol style="list-style-type: none"> Workshop Attendance Registers Number of public engagement workshops carried out. Workshop reports, A/V recordings of dramas & focus group discussions, voting sheets, community voting sheets, workshop & focus ground attendance registers. 	<ol style="list-style-type: none"> Chinyika & Rusike communities see the value in being educated about psychosis Well planned and organized public engagement workshop will ensure meeting of project objectives Village Health Workers’ community work skills & experience will help in mobilizing the community to attend the workshops

<p>increased & informs future project implementation strategies 5. Feedback given to the community on the Research findings from the Z Factor project empowers communities to make informed treatment decisions and increase their knowledge about their own attitudes and beliefs about mental illness</p>	<p>improvement of service delivery 4. Longitudinal baseline information from Tlyor & Dear (1981) tool, Elders' voting sheets, qualitative interviews, community voting sheets, audio/video recordings of drama & workshop proceedings have answered Z Factor's research questions 5. End of project reporting feedback workshop is held in Goromonzi</p>		
<p>Inputs (Activities) 1. Involve 48 Village Health Workers (32 Chinyika & 16 Rusike) to act as community mobilizers from the EIP Lay Health Workers training project. 2. Organize a combined all stakeholder workshop for Chinyika & Rusike to plan the implementation of Z factor with community leaders 3. Organize a combined/separate community workshop to introduce the drama competition to Chinyika & Rusike communities 4. Organize a combined auditions workshop to select 10 drama groups to compete</p>	<p>1. 48 VHWs recruited and equipped to work as community mobilizers & workshop organizers. 2a. All stakeholder workshop conducted with mental health service providers & service users 2b. Community elders, stakeholders and mental health users identified and engaged to work as part of the drama judging panel (e.g., 5 panel members for each area T=10). 3. Project introduction Community workshop conducted 4a. Combined drama auditions workshop carried out 4b. 10 drama groups selected to</p>	<p>1. Number of VHWs willing to act as community mobilizers, community mobiliser registers. 2a. All stakeholder workshops attendance registers, meeting outcome report with proposed project implementation plan 2b. Number of stakeholders willing to become members of the judging panel 3. Workshop report 4. Drama auditions audio/video recordings, auditions participants</p>	<p>1. Village Health Workers are eager & have the requisite skills to mobilize communities & organize the workshops 2. Chinyika & Ruske stakeholders (e.g., local leaders) are willing to actively participate in the planning and implementation of the Z factor project 3. Drama which is a key cultural information transmission media will incentivize the community to attend the workshops 3. The project inputs will be sufficient to realize project outputs</p>

Zimbabwe Early Intervention in Psychosis

<p>5. Organize public engagement drama workshops for Chinyika & Rusike separately</p> <p>6. Organize final combined drama competition workshop at Chinyika</p> <p>7. Organize Z Factor feedback workshop for the community</p> <p>8. print or electronic Publication/dissemination of project findings</p> <p>9. End of project evaluation</p>	<p>compete</p> <p>5. Separate initial drama competitions/workshops carried out.</p> <p>6. Combined final drama competition workshop carried out</p> <p>7. End of project community feedback workshop carried out</p> <p>8. Project findings disseminated at the community, national & international level,</p> <p>9. End of project evaluation carried & the findings influence future public engagement activities</p>	<p>register</p> <p>5. workshop reports, pre-post workshop longitudinal questionnaires (e.g., for drama participants/identified group to be followed throughout the project life)</p> <p>6. workshop reports, baseline data questionnaires, audio/video recordings</p> <p>7. workshop reports</p> <p>8. project findings' report/academic articles/learning outcomes etc</p> <p>9. Z Factor project evaluation report</p>	<p>4. Project inputs will constantly be monitored & adapted to ensure meeting of project aim & objectives.</p>
